

Raymark Superfund Site OU5 Shore Road Public Meeting and Hearing

The U.S. Environmental Protection Agency will hold an informational public meeting on August 8, 2023, from 6:30-8:00 PM and a Public Hearing on September 6, 2023, from 6:30-8:00 PM regarding Operable Unit 5 (OU5 Shore Road) of the Raymark Superfund Site in Stratford, Connecticut.

The public meeting will be to update the community of EPA's investigations at OU5-Shore Road and to answer any questions. Based on these completed investigations (referred to as a Remedial Investigation and Feasibility Study or "RI/FS"), EPA anticipates releasing its preferred cleanup alternative (documented in a "Proposed Plan") before the start of the formal public comment period which will begin on August 9th and will close September 8th.

EPA will also hold a formal public hearing on September 6, 2023. EPA will accept written comments during the 30 days public comment period and will also accept verbal comments during the Public Hearing.

The proposed plan, once released, will be available for the public to review on EPA's website.
